

16 June 2011

Enable Business have provided me with beneficial advise and clear direction on the best way to manage the financial side of my business. They work with you and ensure that you understand the terminology and implications of different approaches. They are forward thinking and are always looking for new options and mechanisms to benefit my business. Since their involvement, I now have an excellent handle on my financials and have an accountant I can trust and rely on, not just one that acts as your letterbox for IRD. I would definitely recommend Enable Business to anyone looking to maximise their business.
